

SIMPLE. FAST.  
EXTRAORDINARY.

## GUIDE TO SEW-IN EXTENSION CARE

Welcome to the revolutionary sew-in application method that gets you in and out of the salon in an hour. Our extensions are made from the highest quality Remy human hair, that looks and feels like your own.

### AFTER APPLICATION

- You can wash your hair the same day you install the extensions.

### EVERY DAY

- Gently brush your hair using the Hotheads® Boar Bristle Brush from the ends to the roots always brushing in a downward motion.

### WASHING & STYLING

- Always detangle your hair prior to washing.
- Use Hotheads® Clean Shampoo & Smooth Conditioner which are specially formulated for our extensions.
- Using products that alter the extensions, such as toning shampoos, and smoothing treatments, voids the warranty.
- Use Hotheads® Hydrate Conditioning Masque 1-2 times per week will moisturize extensions & help maintain longevity.
- Heat should not exceed 350° for human hair extensions.
- When using heat tools to style your hair, make sure to protect your extensions with a thermal styling product from the mid-shaft to the ends.

### SLEEPING

- Never go to sleep with wet or loose hair. Before bed, brush hair to detangle and gently tie into a loose ponytail or braid.

### SWIMMING & VACATION TIPS

- Rinse hair immediately after swimming or exercising.
- Spray tans, sunscreens, hard/well water, and bronzing products may contain minerals that can cause discoloration.
- In a spray bottle, mix water with Hydrate Conditioning Masque and use as a leave-in conditioner if you will be swimming or around products containing minerals. This will provide a protective barrier on the hair.
- If discoloration has occurred, ask you stylist about or Recover Demineralizing Treatment.
